IVEY, certify that this Paper and the enclosed Transmittal Form PTOSB21 are being deposited with the U.S. Postal Service with sufficient postage as First Class Mail addressed to Mail Stop Amendment, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450 on January 14, 2005

January 14, 2005

  
James D. Ivey, Reg. No. 37,016

**RESPONSE TO RESTRICTION REQUIREMENT**

In response to the Office Action dated December 16, 2003, in which the Examiner required restriction of the referenced patent application to a single invention, Applicants elect Group One (1), which includes Claims 1-19, drawn to trailer dolly, classified in class 180, subclass 11, without traverse.

With respect to Invention I, i.e., Claims 1-19, the Examiner required further restriction to the following species and subspecies:

- Species I (Figure 1 – a single wheel) or Species II (Figure 5 – a pair of wheels).
- Subspecies I (Figure 2 – beveled gear transmission) or Subspecies II (Figure 9 – band-driven transmission).

With respect to Species I and II, Applicants respectfully submit that all pending Claims 1-19 are generic. None of Claims 1-19 recite more than a single wheel. Nonetheless, Applications elect Species I, i.e., Claims 1-19.

With respect to Subspecies I and II, Applicants respectfully submit that Claims 1-4, 6-8, and 17-19 are generic. Both subspecies can include a centrifugal clutch (Claim 3), a sliding member (Claims 4 and 7), and forward and reverse gears which are driven together (Claim 8).
